The bug fix was included in the last Gantt Chart I delivered.

And the function specifications where ready to, but in on of the Discord groups, a teacher wrote it was ok to deliver the next week, so I guess I misunderstood that.

Julie Larsen - Aug19 FT 04/21/2020
@online-teachers why are we making functional specs before all the user research?

MJ Phillip 04/21/2020
@Julie Larsen - Aug19 FT if you'd rather submit the functional spec after you've done user research then you can just include the functional spec with your final delivery.

INE - AUG19 FT 04/21/2020
@online-teachers So we can deliver Project planning document and Gantt chart this week? And functional spec next week if we find that easier?

MJ Phillip 04/21/2020
@INE - AUG19 FT the main point of these weekly deliverables is so that 1) we can check that you are on track to deliver the final assignment and so we can give ideas for any changes 2) making sure you have the required elements for the final report and delivery.
